## MGM Solutions Awarded Patient Wandering Management System Contract at West Palm Beach VA Medical Center

**WOOLWICH TOWNSHIP, NJ March 12, 2020** MGM Computer Systems Inc. dba MGM-Solutions (MGM) is pleased and honored to announce it has been awarded a new contract to install a Patient Wandering Management System at the West Palm Beach VA Medical Center in Florida. Following a comparative analysis, the Government determined MGM is able to provide the best value, considering the company's technical and past performance factors as well as price.

Building on its portfolio of installed patient wandering management systems within the VA health system, MGM will deploy its SecurTRAK solution in the medical center's Community Living Center (CLC). Using active Radio Frequency Identification (RFID) badges worn by patients, SecurTRAK affords staff a 24/7 real-time locating system (RTLS) that allows remote monitoring of patients and residents who may be at risk of leaving a secured zone unaccompanied.

Used to enhance the safety of patients or residents in the medical center, SecurTRAK provides staff a complete map view of the facility showing the precise location of each patient or resident. Secure zone parameters are customized based on patient or resident risk (room level, unit level or facility level). If an at-risk patient wanders from a secured zone, SecurTRAK offers immediate staff alerting and integration to automatically lock elevators and exit doors and initiate Closed-Circuit Television (CCTV systems).

MGM-Solutions is a Service-Disabled Veteran Owned Small Business (SDVOSB). As a technology integrator and software developer, MGM will provide all necessary hardware, software, labor, training, user guides, equipment and supervision for installation and delivery.

To learn more about all the SecurTRAK Real-time Locating System (RTLS) products that use Active RFID technology to track people and assets in real-time across whole campuses - indoors and outdoors – get in touch with Mike Maurer, President, MGM Computer Systems, Inc. at Ph: 856-371-3764 or email:
